

Suraj Agrawal

Full Stack Developer

Bangalore | surajagrawal6398@gmail.com | +91 6398081768 | LinkedIn | GitHub | LeetCode

Summary

Full Stack Developer with **3+ years of experience** building scalable **SaaS platforms**, real-time systems, and **IoT dashboards** using **React**, **Node.js**, and **TypeScript** in product-based environments. Skilled in **performance optimization**, reusable frontend architectures, **WebSocket-based systems**, and end-to-end product development.

Technical Skills

- **Frontend:** React, Next.js, TypeScript, Redux, Tailwind CSS, React Query, Zustand
- **Backend:** Node.js, Express.js, REST APIs, WebSockets, Authentication
- **Languages:** JavaScript, TypeScript
- **Databases:** MongoDB, PostgreSQL
- **DevOps:** AWS (EC2, S3), Docker, NGINX, Deployment, CI/CD Basics
- **Tools:** Git, GitHub, Docker, Mongoose, Zod
- **Core Areas:** Real-time Systems, Performance Optimization, Frontend Architecture, System Design

Experience

Software Engineer, Nhance Digital BuildTech Pvt Ltd. June 2024 – Present

- Developed real-time **2D IoT dashboards** in **React** for monitoring **5000+ live sensor data points** and workspace systems, improving operational visibility for enterprise facility teams.
- Built scalable client onboarding and deployment workflows with **WebSockets**, **multi-stage provisioning**, and rollback support, reducing onboarding time by **40%** and improving deployment reliability.
- Integrated **OpenAI ToolCall APIs** and **BMS workflows** to automate operational insights and centralized infrastructure monitoring across multiple enterprise environments.
- Optimized high-frequency data rendering pipelines and frontend state management, improving **UI responsiveness by 60%** for large real-time datasets.

Associate Software Developer, LegalYatra Technology Apr 2023 – May 2024

- Developed multi-step rental agreement workflows and dynamic **React interfaces** used for document-driven onboarding and verification processes.
- Built reusable frontend components and integrated **REST APIs** while contributing to backend validation, form processing, and **MongoDB-based document workflows**.

Projects

ChunkStream Upload Engine GitHub

- Built a scalable **chunk-based file upload engine** with **parallel uploads**, **resumable transfers**, retry recovery, and stream-based processing for reliable large-file handling using **React**, **Node.js**, and **TypeScript**.

Typed-Form-Manager GitHub

- Developed a **type-safe React form library** with reusable hooks, schema-driven validation, and optimized rendering to simplify complex dynamic forms with strong **TypeScript inference**.

Education

Bachelor of Technology 2017 – 2021

Anand Engineering College, Agra

Post-Graduate Certification in Full Stack Development

DCT Academy
